

Two components coating has never been so easy

- Mixing ratio from 1:1 to 100:0
- Mixing ratio tolerance under $\pm 1\%$
- All the parts in contact with fluid in stainless steel.
- Different gear pumps for different paint output.
- Easy programming with latest generation software.
- Different levels of software access:
 - 1) operator
 - 2) paint shop manager
 - 3) software provider
- Pot Life Control System™: electronic monitoring of the pot life from the mixing to the gun, with automatic alarm and purge.
- Excess pressure sensor for total reliability.
- Max pressure 16 bar.
- Automatic pot flush system.
